

IT SOLUTIONS FROM
KONICA MINOLTA

Solutions for large and international projects

- > The system is based on the international platform of Microsoft Dynamics, which guarantees the long-term support and system development. Of course there is the possibility of implementation of the solution, not only between branches of the given organization in one country, but also extension to foreign branches.
- > The Microsoft Dynamics Platform offers the support for multiple languages and currencies, ensuring the current legislation of the given country, other features specific to a particular country and a range of shared services to multiple sites and collaboration features for the cooperation of multiple organizations. We allow you to work effectively, to manage changes and achieve global competitiveness. Thanks to the solutions you can be sure that your solution for managing the organization will always respond to workers' needs and to requirements of your business.

Main benefits of Microsoft Dynamics

- Allows management of the organization across multiple operations in a single, customizable global ERP solution.
- You will get an overview of all operations in real time – a complete overview of the entire organization for the purpose of financial reporting and operational decisions.
- Optimization of business processes - by consolidating and standardizing processes, your organization can begin to optimize business functions (e.g., inter-company trading, planning for multiple locations or balance of accounts).
- A possibility to expand into new markets - rapid scaling of global ERP solution supports adding new locations, geographic units or industries with minimal IT effort. Intercompany features and functionali-

ties supporting multiple sites, languages and currencies provide seamless collaboration across borders and also the support of local taxes, regulations and market requirements.

- Simplifying the IT environment - standardization on one ERP solution that is based on the Microsoft platform, facilitates innovation by leveraging existing investments in products and technologies of Microsoft such as Microsoft SharePoint Server and Microsoft Office products.

Benefits of implementation

- The solution is always designed uniquely for a given client based on a thorough analysis of the processes and client requirements.
- The entire implementation is solved according to the SURE STEP methodology by Microsoft with the added value-added of own solutions of WEBCOM.
- We guarantee the long-term support and system development.
- We will design such a solution that will fully respect the operation of your company and your specific business.
- The development and maintenance of your corporate system after the implementation will be cared for by the team of support managers, which will allow you to have a solution in accordance with the legislation, always up to date and any change requests will be promptly resolved.
